

CRISIS MANAGEMENT

The ability to act quickly and decisively in a crisis is paramount to avoiding excessive losses and averting negative impact on your Organisation as well as being able to resume normality as quickly as possible. By in large most Company Executives are equipped to manage crisis situations but they may not be prepared for the demanding circumstances that generally arise during a crisis event of significantly larger proportions.

Infinite Security Solutions (ISS) can assist your Management or Crisis Management Team (CMT) in such incidents where time is of the essence and objectivity can be fundamental in reducing the impact on your Company whether financially, legally, publically or politically.

ISS also has a Crisis Management Team in place to develop Crisis Management Plans including Business Continuity Plans and Contingency Plans (i.e. Evacuation Plans etc.). It is impossible to prepare for every eventuality but with comprehensive Crisis Management Procedures in place adverse occurrences on your business can be reduced significantly.

An important factor in Crisis Management planning is implementation. ISS provides Communications training in this area initially with Communication workshops. ISS has found that this approach not only improves the handling of Crises but also helps client's business function more effectively across the board.

ISS provides training for and assistance with:

- Crisis and Incident Management
- Contingency Plan Development including Evacuation Planning
- Workshop Facilitation
- Scenario Exercises (table-top)

Upon completion of training ISS can test Crisis Management Plans with Crisis & Incident Management Scenario Exercises developed specifically for your Organisation.

ISS also undertakes Reviews and Gap-analysis Reports for Crisis Management Plans including familiarisation training of Crisis Management Team (CMT) Policy, Procedures, Responsibilities and Systems.
