# PROJECT MANAGEMENT:
## SAFETY & SECURITY, INC: ACCESS CONTROL & CCTV SOLUTIONS

**ISS** provides a Project Management Service for clients who require a start to finish solution for Safety & Security during any kind of 'infrastructure' project. This commences with a detailed Risk Assessment followed by concept development and then interaction between the various stakeholders, which may include government bodies, Emergency Service providers, suppliers, clients and all other parties with stakeholder interests. Once the concept is agreed, ISS then develops the specification and sources product providers on behalf of the client, then oversees the delivery, fabrication, test and commission of the specification to the clients satisfaction.

Examples of this type of work **ISS** have been involved with include the management of large number of workers, whereby the client wished to monitor, track and document large numbers of workers on a project location, involved with passing through a sensitive area. **ISS's** involvement started at the concept stage and used all aspects of our organisation: *Consultancy, Products and services.*

*Consultancy*: ISS can advise you at the beginning drawing up the security concept and advising on the budget aspect ensuing value for the system required for your task.

For example; access control, and CCTV, **ISS** will advise you on the various:

➢ Management Systems Available
➢ Access Control Systems available, Cards; Barcode, RFID, Chip, etc.
➢ Biometrics: finger, palm, facial, retainer etc
➢ Cameras: fixed, PTZ
➢ Public Address
➢ Hardware: turnstiles;  flap, arm revolving
➢ Layout

Once the budget and concept are in place **ISS** can project manage the design and build aspect ensuring that the time lines to implementation are maintained. During the build stage **ISS** will develop your documentation covering all aspects; operations, HSE and Security. This will also include the implementation of the documentation to ensure you have a system that meets your operational requirements.

*Products*; Most projects are fitted with public announcement systems however these are only part of the solution required. **ISS**  will advise and provide you with additional solutions to deal with the day to day requirements of the project, covering both safety  and security. ISS also understands that the systems often require to be expanded or relocated during the life span of the project and have developed a portable solution to facilitate this requirement

*Services*;  Once your system is in place the work starts. ISS will then support the system integrated by supporting the employment, training and operational requirements of the various departments to ensure that  the dormitory management team is operational equipment to use the security solution and that the suppliers ensure that the system is user friendly and operational. ISS will support you to ensure that a review of the system is conducted and that any operational changes required are made
